

## **ABS CEMENT P LTD**

### **PICTURES OF OUR 70 TPD VSK CEMENT PLANT (1996)**

ABS cement factory is set in 10,000 sq metres land & was set up at a total project cost of \$ 400,000 in 1991. The VSK section & the raw mill were sold in 2001 to Butwal Cement, Nepal (as there was no limestone available in our vicinity) & presently ABS produces only blended cement.

We operated ABS cement till July 2003, when we chose to shut down our plant due to increased advisory assignments. ABS Cement is debt free and still owned by us.

Fig 1. Vertical Shaft Kiln is clearly visible with Limestone & Jaw crusher in the foreground

FIG 2. Cement Mill with Cement Silo, Packing Machine & Cement Godown.  
(This machinery that will be required if we opt for a Cement Grinding plant)

ABS Cement p ltd

Office, lab & a weighbridge in the foreground. Behind are the workers quarters & workshop including two captive DG sets capable of producing 700 HP power.
